

Animals in the setting

Children learn about the natural world, it's animals and other living creatures, as part of the Early Years Foundation Stage curriculum.

What we aim to do

We aim to ensure that contact with animals, or other living creatures, either in the setting or in visits is in accordance with the hygiene and safety controls in the nursery.

How we will achieve this

In order to achieve our aims the following procedures have been put in place.

Animals in the setting as pets

- We take account of the views of parents and children when selecting an animal or creature to keep as a pet in the setting.
- We carry out a risk assessment with a knowledgeable person accounting for any hygiene or safety risks posed by the animal or creature. This Risk Assessment is reviewed on a termly basis.
- We provide suitable housing for the animal or creature and ensure this is cleaned out regularly and is kept safely.
- We ensure the correct food is offered at the right times.
- We make arrangements for weekend and holiday care for the animal or creature.
- Children are taught correct handling and care of the animal or creature and are supervised.
- Children wash their hands after handling the animal or creature and do not have contact with animal soil or soiled bedding.
- Staff wear disposable gloves when cleaning housing or handling soiled bedding.
- If animals or creatures are brought in by visitors to show the children they are the responsibility of the owner.
- The owner carries out a risk assessment, detailing how the animal or creature is to be handled and how any safety or hygiene issues will be addressed.

Visits to farms

- Before a visit to a farm a risk assessment is carried out - this may take account of safety factors listed in the farm's own risk assessment which should be viewed.
- The outings procedure is followed.
- Children wash their hands after contact with animals.
- Outdoor footwear worn to visit farms is cleaned of mud and debris and should not be worn indoors.

Visitors to the setting

- Before someone comes into the setting an "innings" risk assessment form will be completed stating numbers of adults and children, the space used and details of any additional risks identified and how they will be managed.

Legal framework

- The Management of Health and Safety at Work Regulations 1999
